

## Xactium and projectnet's on-demand applications leverage the power of Salesforce and the Force.com platform to deliver innovation and increased productivity

### BUSINESS CHALLENGE

When it comes to generating PDF documents from your Salesforce data, the process can be both time consuming and frustrating. At Xactium and Projectnet, we recognized that a simpler and more efficient process was needed for creating PDF documents from salesforce.com content that didn't rely on working with complex Word merge fields or HTML editing.

### FORCE VISUALIZER

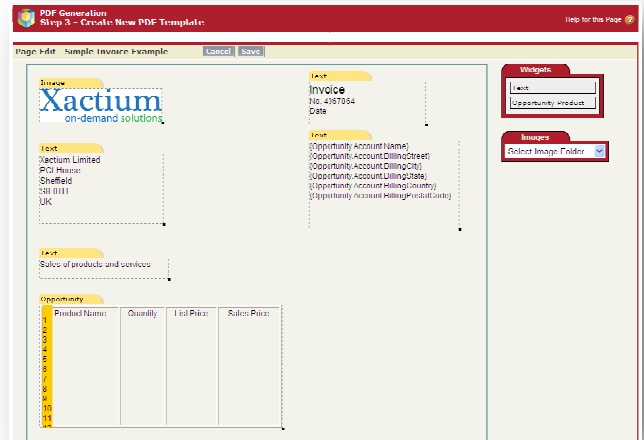

Force Visualizer is a native Force.com app for rapidly and intuitively creating PDF documents using simple to use design tools.

Using wizards and drag and drop tools it guides you through the process of assembling PDF document templates. These are populated with Salesforce data at the click of a button.

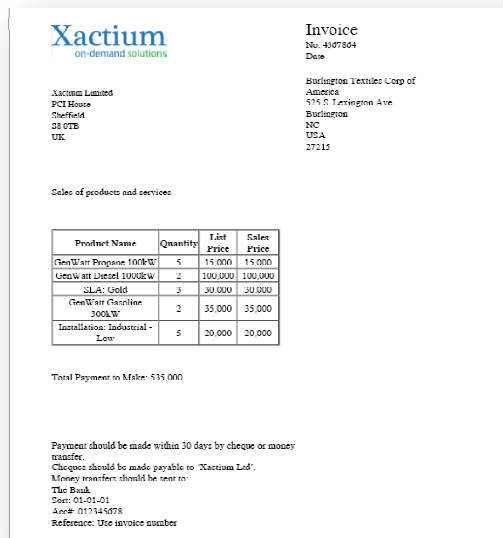

HIGHLIGHTS	
<b>Simple to use</b>	Create your own custom PDF templates by dragging and dropping text boxes and tables into the PDF document.
<b>Fast, Easy, Effective</b>	Wizards guide you through the PDF design process.
<b>Web Based</b>	Benefit from a powerful, visual document creation medium.
<b>One Click PDF generation</b>	Turn records into PDF documents with the click of a button.
<b>Create your own custom PDF templates</b>	Create a wide variety of different templates and share them across the organization.
<b>Access data in multiple Salesforce.com objects</b>	Easily navigate around multiple Salesforce objects to select the fields you need.
<b>Native Force.com App</b>	Completely native. All your data stays within Salesforce.com. No third party integration required.

### FEATURES

**Drag and drop template creation:** Just drag and drop Salesforce record fields and images onto the screen to create a template. Tables can also be easily created through selection of appropriate related list fields.

**Easy to configure:** quickly select fields to be used in text boxes and tables using easy to use wizards. Share templates across your organization with ease.

**Simple to Integrate:** Because Force Visualizer is a native Force.com application, it can easily be integrated with your Salesforce organization and data.
